SUMMARY

Software engineer with over 6 years of expertise in crafting cutting-edge solutions. A specialist in microservice architecture and development, I thrive on unraveling complex challenges through a combination of data mining and insightful data analysis. With a robust foundation in leadership, critical thinking, and problem-solving, I am ready to be your go-to professional for navigating the intricacies of modern software development.

EXPERIENCE

Senior Software Engineer

E.Tel Communications Pty Ltd

June 2024 - Present, Australia (Remote)

- Member of the Main IT Team, responsible for developing and maintaining various products, with a primary focus on mobile service provider solutions. Most recently, led the development of a new product for the Australian market:
 - Australia's Only Mobile Plan That Comes With Free Coffee (<https://app.coffeemobile.au>).
 - Travel eSIM with Affordable International Data (<https://apply.etel.com.au/travelesim>).
- Designed and implemented dynamic full-stack solutions following the Agile software development life cycle, utilizing technologies such as Python (FastAPI), MySQL, PostgreSQL, and Vue.js with the Quasar Framework.
- Contributed to enhancing system scalability, reliability, and user experience by leveraging modern development practices and tools.

Senior Software Engineer

PT. Tokopedia

June 2022 - May 2024, Jakarta

- Part of the Catalog and Price Recommendation team, where our main objective is to suggest competitive product prices over most of all known marketplace in Indonesia for seller experience, and give the recommendation of curated products on the catalog for buyer experience.
- Design end-to-end system architectures and build a highly concurrent and distributed system by prioritizing aspects of scalability, availability and reliability, leveraging technologies such as NSQ, GRPC, Elasticsearch, and Redis. Our service endpoint success rate is almost always 100%.
- Developing automated data mining engines and recommendation engines using LLM models and data science approaches, where the engine improves our service accuracy up to 70-80% per product category.
- Actively engaging in mentoring junior members and leading the daily team progress report.

Software Engineer

Innova Solution Taiwan, Ltd

October 2020 - May 2022, Taiwan

- Part of R&D of Change Healthcare U.S., engineered a robust enterprise healthcare platform integrating DICOM and HL7 standards that streamlined digital imaging and medical information exchange processes, enhancing interoperability across 25+ hospital systems.

Software Engineer

PT. Besmart Global Indonesia

August 2016 - June 2018, Jakarta

- The client-centric company specializes in delivering solutions to meet the unique needs of each client, with a diverse portfolio spanning across various sectors including banking and manufacturing.

EDUCATION

Bachelor of Informatics

Universitas Brawijaya • Malang • 2016

Master of Science in Computer Science

National Central University • Taiwan • 2020

- Awarded full scholarship for 2 years due to grades.

SKILLS

Programming Language: Go, Java, C#, Python

Front End: Node.js, Angular.js, React.js, Vue.js

Back End: Spring boot, FastAPI, Redis, MySQL, PostgreSQL, MongoDB, Elasticsearch, NSQ, GRPC, GraphQL, Docker, Kubernetes, Amazon Web Service (AWS), Google Cloud Platform (GCP)
